PROFESSIONAL SUMMARY

Senior Full Stack Engineer with 5+ years of experience building production-grade **MEAN and MERN** applications for **healthcare, eCommerce, and IoT** domains.

Strong hands-on experience with **Angular, React.js, Next.js, Node.js, NestJS, TypeScript, MongoDB, PostgreSQL, MySQL, and Redis**, with a focus on scalable APIs, backend systems, and modern frontend applications.

Delivered **microservices-based platforms, AI-assisted search systems, real-time workflows, RBAC-enabled applications, and AWS-hosted deployments** in production environments.

Currently contributing to a **Post-Acute EHR platform**, improving application security, system reliability, performance, and engineering execution across frontend and backend systems.

Comfortable working with **distributed teams** and maintaining overlap with **US and EU time zones**.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript
Frontend	React.js, Next.js, Angular, Redux, HTML5, CSS3, SCSS, Tailwind CSS, Bootstrap, Material UI
Backend	Node.js, Express.js, NestJS, REST APIs, Microservices
Databases	MongoDB, PostgreSQL, MySQL, Redis, Elasticsearch
ORMs	TypeORM, Mongoose
Cloud & DevOps	AWS (EC2, RDS), Docker, NGINX, PM2, GitHub Actions
Real-Time Systems	Socket.IO, Redis, Bull Queue
AI & Search	Vector Search, Embeddings, AI Ranking, Product Matching
Architecture	OOP, SOLID Principles, Design Patterns, Monorepo
Security	JWT, RBAC, Application Security
Tools	Git, GitHub, Linux (Ubuntu), Postman

PROFESSIONAL EXPERIENCE

Senior MEAN Stack Developer

Jan 2026 – Present

DoctorNow

Lahore, Pakistan

Working on **DoctorNow**, a **Post-Acute EHR (Electronic Health Record) platform** focused on streamlining clinical workflows, patient charting, and care management.

- Leading a team of **2 developers**, providing technical guidance, reviewing implementations, and improving delivery quality.
- Improving **application security**, system reliability, and safeguards around sensitive healthcare data.
- Implementing **error handling and stability improvements** across frontend and backend systems in a production healthcare environment.
- Performing **performance optimizations**, including frontend improvements and backend query optimization.
- Integrating **third-party APIs** for extended platform capabilities.
- Delivering ongoing **feature enhancements** and system improvements across the application stack.
- Debugging and resolving **production issues**, helping maintain continuous system availability and support responsiveness.
- Documenting root causes, implementation decisions, and approved fixes for production deployment.

Senior MERN Engineer
Code UpScale

Sep 2024 – Dec 2024
Lahore, Pakistan

Worked on **Ilgos**, a **multi-tenant eCommerce platform** focused on product standardization and large-scale data processing across multiple vendors and catalogs.

- Built features for a **microservices-based system** using **Next.js, NestJS, MySQL, TypeORM**, supporting scale across multiple tenants and catalogs.
- Built a **vector-based product search system** for similarity matching across large product datasets.
- Integrated **AI-based ranking** to improve product search accuracy and user decision-making.
- Implemented **CI/CD pipelines** using GitHub Actions for automated build, test, and deployment workflows.
- Managed deployments on **AWS EC2** using NGINX, PM2, and RDS.
- Implemented **real-time and background processing** using Redis, Bull Queue, and Socket.IO.
- Engineered data migration workflows for **20+ years of legacy data** while maintaining data integrity.
- Contributed to **backend optimization** for improved performance and scalability.

MEAN Engineer
Focusteck

Mar 2023 – Sep 2024
Lahore, Pakistan

Worked on **Ideawake**, an **idea management platform** enabling organizations to collect and implement ideas.

- Developed platform capabilities using **Angular, NestJS, PostgreSQL, Redis, and Elasticsearch**.
- Contributed to **microservices-based systems** designed for scalability and maintainability.
- Implemented **real-time features** using Socket.IO.
- Improved search and application performance using Redis caching and Elasticsearch.
- Collaborated with QA and cross-functional teams to deliver stable releases.

MERN Engineer
EMI Fusion

Sep 2020 – Jan 2023
Lahore, Pakistan

Worked on **OT Panel**, an **admin system for embedded devices** used in Operation Theater environments, along with internal project management tools.

- Built **IoT-based admin panels** using MQTT over WebSockets.
- Developed **REST APIs** using Node.js, MongoDB, and PostgreSQL.
- Implemented **Redux-based state management**.
- Contributed to **RBAC systems** for controlled access and admin workflows.
- Worked on internal **project management tools** supporting sprint-based task execution.

EDUCATION

- **Master in Computer Science (MCS)**, BZU Multan
- **Bachelor in Computer Science (BCS)**, BZU Multan

Oct 2018 – Oct 2020
May 2016 – May 2018
